<tr>
<td>Ethiology</td>
<td>electric burns (arc), right and left hand</td>
</tr>
<tr>
<td>Indication</td>
<td>mixed burns of degree 2a and 2b, small parts 3°</td>
</tr>
<tr>
<td>Therapy</td>
<td>SUPRATHEL® (right hand small parts additionally grafted)</td>
</tr>
</tbody>
</table>

* Day of trauma
* Day 14, both hands treated with SUPRATHEL, left hand reepithelized completely
* Right hand: only small parts had to be grafted with sheet grafts, other parts healed completely under SUPRATHEL
* After 1 year: both hands showed a sufficient cosmetic result (nearly scarless) with very good functionality. The result after delayed grafting and SUPRATHEL application on the right hand is not worse than after a primary grafting

Hospital for Trauma Surgery – Burn Center, Marienhospital Stuttgart/Germany, Dr. med. Christian Uhlig
