

# CASE STUDIES

## Case Study:

## Electric burns (arc), right and left hand

### Description

Age of patient	53
Gender	male
Ethiology	electric burns (arc), right and left hand
Indication	mixed burns of degree 2a and 2b, small parts 3°
Therapy	<b>SUPRATHEL®</b> (right hand small parts additionally grafted)

» Day of trauma

» Day 14, both hands treated with SUPRATHEL, left hand reepithelized completely

» Right hand: only small parts had to be grafted with sheet grafts, other parts healed completely under SUPRATHEL

» After 1 year: both hands showed a sufficient cosmetic result (nearly scarless) with very good functionality. The result after delayed grafting and SUPRATHEL application on the right hand is not worse than after a primary grafting
